- Hints & Tips -

Counter

Akechi Mitsuhide and Musashi Miyamoto both have the special ability to counter an opponent's attack. To do this, you must execute a well-timed button press while in the Special Stance (R1 button).

How to Fight Groups

There are times when the enemy will attack you in groups using powerful combined attacks. A good way to defeat these groups is to first defeat their leader. Once the leader has been defeated, the group can no longer coordinate combined attacks. In narrow places inside of a castle, it is best to confront them with a Musou attack.

	Fire	The target is engulfed in flames and continues to be damaged while burning.
	Lightning	The target and nearby enemies are struck by lightning.
	Ice	The target is temporarily frozen and unable to move.
	Wind	Breaks through the target's guard and inflicts damage.
	Demon	Increases the chances of defeating an enemy in one blow.

Elemental Attacks

Your weapons will gain elemental attributes if you have either the "Element" or "Ele-Charge" skills. The higher the skill level, the more powerful its effect.

Mines

Mitsunari Ishida and No have this ability. Set mines using Special Move 1 and activate them by using Special Move 2. Besides inflicting damage to multiple enemies, this can also knock enemies off their horses.

Special Moves

Be sure to take advantage of your character's special moves (R1 button +  /  button).

Critical Hits

A critical hit inflicts 1.5 times the damage of a regular attack and occurs randomly. Critical hits occur more often if you have a high "Luck" attribute. Having the "Sickle" skill will also increase your chances of inflicting a critical hit.

Taunts

Masamune Date and Hideyoshi Toyotomi have this ability. Enemies affected will have their defenses lowered but their attack strength increased. Try to defeat them before they get a chance to attack.

Learn

High level and rare skills are difficult to learn by defeating enemy officers. You should start out by aiming for lower level skills first. There is no sure way of obtaining a skill, but defeating your opponent as quickly as possible and sustaining as little damage as possible will increase your chances. If you have the skill "Prodigy," your chances of acquiring new skills by learning is increased.
